SUBJECT: Comment on ICD Latin American Paper

This ICD paper is extremely good - well-written and carefully organized. My comments, given below, are really quite minor:

Pages 7-8: Word "liberation" in the fourth line from the bottom on page 7 is not in quotes. Used in the same connotation in the first sentence at the top of page 8, it is in quotes. The usage should be uniform.

IA (page 1), last sentence on page 1 and first sentence on page 2: It would be better to say: "is not functioning" or "functions poorly", thus avoiding two gerunds.

Page 14: Why give address of mail drop?

Page 35d: Suggest rephrasing of last sentence, second paragraph, beginning "However, although their movements" As written it is a little awkward.
